Maybe its just me...or maybe I just need a bunch of colorful pictures, but these documents still don't capture the basic message that these others do.

Maybe its something to bring up at the conference as a Regional need.

The handbook is for handing out. You can always just hand out the fact sheets of the COCs at your site, along with the glossary. So if you wanted something fairly short, print out:  
<http://www.epa.gov/superfund/health/contaminants/radiation/pdfs/introglos.pdf>  
<http://www.epa.gov/superfund/health/contaminants/radiation/pdfs/radium.pdf>  
<http://www.epa.gov/superfund/health/contaminants/radiation/pdfs/radon.pdf>

That's only 11 pages.

The video was developed to show at public meetings (its only 18 minutes) or to make available the dvd/vhs for residents.

Stuart:

These are good resources, are very involved and computer based. We need something simple to "hand-out" at meetings and make available to the public.

Could you task a contractor to develop one like the one ORIA prepared, but tailored for SF?
